SUMMARY

Full-stack software developer based in Cagayan, Philippines, with a strong focus on AI integration and end-to-end product development. Works primarily in Angular, React, TypeScript, and ASP.NET, with solid backend experience in REST APIs, database design, and cloud deployment. Experience spans AI-powered web apps, e-commerce platforms, and inventory systems, with freelance work across software development, research, and documentation.

WORK EXPERIENCE

Software Engineer Intern

Inventory Management System – Kabalikat Para sa Maunlad na Buhay Inc. (KMBI) December 2025 – March 2026

- Built a role-based access system for **100+** users across multiple branches using **JWT authentication**, giving different permission levels to managers, staff, and admins, the system is live and used daily
- Developed the login system, dashboard analytics, export sheets, and activity history logs for the platform, which helped cut report generation time by **30%**.
- Handled **REST API** development, wrote API documentation, and tested all endpoints using Postman to make sure they worked correctly and were easy for the team to maintain.
- Deployed and configured the application on Microsoft Azure for reliable cloud hosting, and collaborated in an Agile team using Angular, ASP.NET, TypeScript, Tailwind CSS, MSSQL, and Git.

PROJECTS

Jaya: Just Ask Your AI | Freelance February 2026

Self-employed

- Built a full-stack **AI-powered** web app used by real users, integrating multiple **LLMs (GROQ, OpenRouter)** through structured prompt engineering to generate context-aware quiz content with practice and exam modes.
- Tech stack: Angular, Express.js, TypeScript, Firebase, GROQ API, Gemini API.

Outspace: Digital E-Commerce | Freelance December 2025

Self-employed

- Built a secure e-commerce platform with **Google OAuth 2.0**, real-time admin dashboard tracking 100+ orders, and optimized loading for 150+ digital assets using **async/await** and **LINQ**.
- Tech stack: ASP.NET Web API, Angular, Entity Framework Core, MSSQL, Firebase.

EDUCATION

Bachelor of Science in Information Technology — Major in Web Development 2026

Cagayan State University – Gonzaga Campus

- Competed in the Web Development contest at the campus level.
- Competed in the IT Uniwide Static Web Design contest, recognized for web development skills.
